id_connection1: When and How - connectivity in terms of speed (bandwidth) in NZ schools is often unusably slow. Partly due to lack of development and expansion of the Schoolzone product - as use in schools has increased, Schoolzone has failed to keep up. Not much hope for the next few years:(
id_connection2: Teaching is a career that can create all others. Our young people are the future. Yet we provide stone age facilities for them. Your document fails to acknowledge this - were any young people consulted?
id_connection3: See above
